Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-25, drawn to a method for searching programming objects by using optional search attributes to order a list of references. Classified in Class 707, subclass 3.

Group II: Claims 33-40, 55, and 56, drawn to a method for determining that object attributes that could be located outside of a static attribute storage area. Classified in Class 711, subclass 100.

Group III, Claims 41-54, drawn to steps of instantiating and initializing a programming object based on the unique identifier, classified in Class 717, subclass 101.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, Group II, and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as retrieving information compared to invention Group II or Group III. See M.P.E.P.

' 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or group III, for Group II is not required for Group I or group III, and for Group III is not required for Group I or group II; Therefore, restriction for examination purposes as indicated is proper.
